

CAPRITANEX-P

(Premixture with tannins & Saponins)

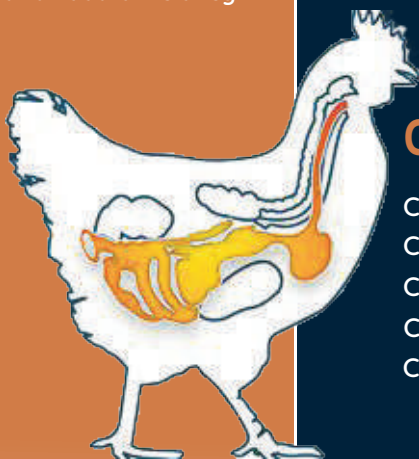

CapriEnzymes
Imagine the eco-future

CAPRITANEX-P is a premixture rich in tannins, saponin and other natural minerals used in the poultry feed act as an antiinflammatory and antioxidant agent. It inhibits growth of pathogens like salmonella, shigella, staphylococcus, pseudomonas & Helicobacter pylori. It is a plant based bio active compound that act synergetically to overcome the threats of ammonia and odour emission and also lowers the environmental impact of livestock production.

CAPRITANEX-P scavenges free radicals & protects the intestinal cell membranes from oxidative stress & maximises performance. It strengthens intestinal barrier integrity. It inhibits growth of coccidia parasite and improves intestinal health and feed efficiency in poultry.

Dosage:

Broilers & Laying hens:
500g-1Kg/ton of feed

Benefits:

- Inhibits growth of pathogens
- Anti-inflammatory & Antitoxin
- Modulates gut microbiota & mucosal immunity
- Gut health management
- Ammonia and odour reduction
- Immune stimulant
- Control Coccidiosis

Our wide range of products...

- Caprizyme G-Guard - Better gut health
- Caprizyme I-Boost - Immune booster
- Caprizyme M-Punch - Chelated minerals
- Caprizyme P-Rich - Phytase enzyme
- Caprizymol - Water soluble probiotic with essential oils
