

CAPRIFEED CLX

(Complex enzymes)

Bring life to your pond!!!

The gut is a fundamental organ which carries out two equally important functions i.e digestion & prevents infection. A healthy gut is essential for efficient conversion of feed for optimal nutrient absorption. If gut health is compromised, digestion & nutrient will be affected and fish or prawns performance and health will be threatened.

Caprifeed CLX is an exceptional combination of multiple enzymes which are helpful for the aquatic animals and shrimps to digest the various energy sources present in the cereal feeds such as starch, fibres, lipids/fats, proteins, phytate, etc.

Advantages:

- Breaks anti-nutritional factors
- Increase availability of polysaccharide & polypeptide
- Decrease viscosity & white discharges
- Increases weight gain & feed conversion
- Reduces ammonia & phosphorous level in pond environment.
- Enhances digestion & absorption of nutrients especially fat & protein

Dosage: 200-300gms per ton
