

# Caprizyme **D-Care**....

Multienzymes

## Unlock the potential nutritive value...

D-Care is an exceptional combination of multienzyme specially designed for poultry to digest the various energy sources present in the cereal feeds such as starch, fibers, lipids/fats, Proteins, Phytate, etc.

Multiple enzyme technologies like D-Care improve the productivity and profitability of animal production while also producing significant sustainable benefits.

Enzymes supplementation to the poultry rations has a positive effect on feed digestibility & leads to better productivity and performance.

### Dosage:

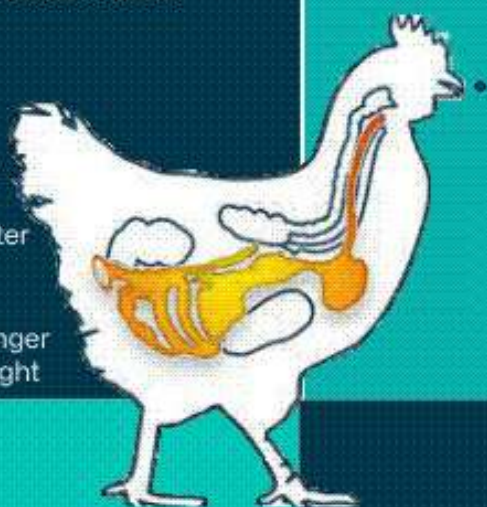

100-200g/ton of feed for broiler

150-200g/ton of feed for breeder layer

Package: 1Kg/5Kg/10Kg/20Kg canister

### Storage

Lower the storage temperature, the longer is the shelf life, avoid exposure to sunlight

## Our wide range of products...

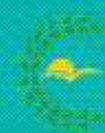

Caprizyme G-Guard - Better gut health

Caprizyme I-Boost - Immune booster

Caprizyme M-Punch - Chelated minerals

Caprizyme P-Rich - Phytase enzyme

Caprizymol - Water soluble probiotic with essential oils

**CapriEnzymes**  
*Imagine the eco-future*

## Advantages.....

- \*Breaks antinutritional factors & maximises nutritive value in feed
- \*Increases availability of polysaccharides and polypeptides
- \*Reduces digesta viscosity and loose droppings
- \*D-Care is versatile to solve necrotic enteritis by degrading antinutritional factors and allergenic protein in feedstuff.
- \*Enzyme supplementation helps animals to digest and utilise energy and nutrients from less conventional feed ingredients.
- \*Decreases gaseous elimination volumetrically
- \*Improved performance & reduced amount of environmental nutrient excretion
- \*Helps for sustainable farming practices
