

Caprizyme® G-Protect (Gut Modulator)

BALANCE THE BENEFICIAL GUT MICROFLORA BY HARMONIZING THE BIODIVERSITY!

A specialised combination of probiotics, prebiotics with vitamin, protect the shrimps sequential digestive process by enhancing the right microorganisms that act as a probiotic inside the gut, helping the better absorption in hepato pancreas.

Benefits:

- ↑ Increases the count of beneficial bacteria in the shrimp's gut
- ↑ Enhances the animal's digestibility and absorption of nutrient to increase muscle mass
- ↑ Augments the weight gain and feed conversion ratio by controlling pathogenic microbial growth

Dosage:

10g/kg of feed

Application:

Product to be mixed in feed using a protein binder and dried for 30 min. The feed is broadcasted every day in the morning meal.

Composition:

Bacillus spp., Lactobacillus spp., Saccharomyces spp., Yeast, MOS & Natural minerals
