

Caprizyme I-Build

Immune modulator+Antitoxin

"Building Shrimp Immunity, Sustaining Aquatic Vitality!"

I-Build is a unique formulation which stimulates the immune system, supports detoxification that affects shrimp health and growth such as aflatoxins, ochratoxins, fumonisins, also removes heavy metals which is accumulated in feed ingredients and improves host defense mechanism, consequently reducing the mortality and enhancing the growth. It has the potential to reduce severity of enteric diseases in aquatic environment.

I-Build plays a major role in the growth and development of the intestine. Also helps combat stress factors that occurs and thereby improves the productivity. I-Build is the innovative formulation that works as an antitoxin and immune builder.

Benefits:

- ↗ Improves specific immune response
- ↗ Prevents re-occurrence of infections
- ↗ Reduces heavy metal concentrations and mitigate their toxic effects on aquatic organisms
- ↗ Increase resistance against pathogens
- ↗ Helps in modulation of intestinal micro flora
- ↗ Provides better performance in stress conditions
- ↗ Improved weight gain
- ↗ Better liver metabolism

Dosage:

5kg/ton of feed

Composition:

Prebiotics
Probiotics
Enzymes
Vitamins &
Natural minerals
