

CAPRI NANOPOWER

(Nano Trace minerals)

NANO PARTICLES OF TRACE MINERALS FOR SHRIMPS

Nanomineral additive improves physiological activities of shrimps, controls mineral deficiency, enhances smooth, moulting process, good FCR & growth. It improves feed efficiency, enhances immune function, and reduces the incidence of diseases.

Benefits:

- ↗ Easier transport through the gastro intestinal tract
- ↗ Better bioavailability and mineral uptake is faster by the shrimp
- ↗ Improved immune function and antioxidant capacity
- ↗ Helps in plankton development
- ↗ Improves physiological activities of shrimp.
- ↗ Controls calcium & phosphorous deficiency.
- ↗ Controls mineral deficiency
- ↗ Enhances smooth moulting process, good FCR & growth

Application:

Once a day before 9 am or after 6pm

Dosage:

20ml per 1kg of feed
1.5ltr/acre or 15m³ pond - 1 ltr

Composition:

Organic trace minerals - Ca, K, Mg, Na, Mn, Zn, Co, Selenium & other micronutrients
