

Caprizyme® P-Spark

(Pond Care Management)

BRING BACK THE SPARKLE TO YOUR POND!

Rich blend of beneficial micro-organisms with prebiotics & Yeast that absorbs the organic load, reducing the COD & BOD and providing a cleaner water base for the grow-out shrimps.

Benefits:

- ✦ P-Spark degrades a wide variety of excess food and other organic waste materials.
- ✦ Improves shrimp pond water quality and color by creating an optimal balance of phytoplankton and natural beneficial bacteria.
- ✦ Provides a well oxygenated environment.
- ✦ Aids in ammonia removal when used with natural nitrifying microbes.
- ✦ Reduces harmful bacteria such as vibrio and other pathogens in the pond system
- ✦ Protects pond yield during disease and environmental stress.
- ✦ Enhances immune response, reduces disease incidence & mortality
- ✦ Restores the well balanced eco-system

Dosage:

500-750g/hectare every week during regular grow-out

Application:

Product to be applied into pond in the morning

Composition:

Yeast, MOS, Bacillus spp., Lactobacillus spp., Consortia of microbial strains, Enzymes & Natural minerals
