

Caprizyme T-Stick

Antitoxin/Immune enhancer

ENZYMATIC TRANSFORMATION OF TOXINS..

T-Stick, an antitoxin. immune enhancer is suitable for breeders and layers, it adsorbs and deactivates mycotoxins. It is effective in binding to a wide range of mycotoxins. including aflatoxins, achrotoxins, and zearalenone, which can be present in corn, soybean meal, wheat, sorghum, sesame cake, fish meal, sunflower meal, and broken rice.

The liver is the organ most affected by mycotoxins. T-Stick accelerate the regeneration of damaged liver tissues, recovering their functions more quickly.

Dosage:

500g-1kg/ton of feed

Absorbed mycotoxins

Mycotoxin	Adsorption %
Aflatoxin B1	100%
Fumonisin B1	56%
Vomitoxin	25%
Zearalenone	98%
Ergotamine	75%
Ochratoxin A	35%
Ergocristine	75% ▲
Ergocornine	85%
Ergcryptine	84%

Composition:

Blend of antitoxin enzymes, MOS, Charcoal Calcium propionate, Herbal extracts & activated natural minerals

Benefits:

- ▲ Prevention of harmful effects of mycotoxins in feed
- ▲ Improves overall liver health & immune system
- ▲ Reduction of incidental diarrhea
- ▲ Improvement in daily weight gain, fertility
- ▲ Improved quality of meat and eggs
- ▲ Reduction of incidental morbidity & mortality in farms
- ▲ Support egg production and egg shell quality
