

# Caprizyme YMC

(Growth Promoter)

## “Shrimp growth accelerated with the power of Growth promoters”

Caprizyme YMC is a promising feed additive with a unique blend of probiotic and prebiotic strain with enzymes, vitamins, algae & aminoacids to improve intestinal microbiota, intestinal morphology, and to improve the resistance of *L. Vannamei* from stressors like bacterial and viral *Vibrio harveyi* infections, Salinity shock, NH<sub>3</sub> exposure and other stresses. It reduces the mortality and enhances the growth and FCR.

YMC provide a comprehensive approach to shrimp growth and health by promoting digestion, enhancing nutrient absorption, supporting immune function, and reducing the risk of diseases, ensuring the overall well-being and growth of the shrimp population.

### Benefits:

- ★ Improves cellular and humeral responses against pathogens (virus, *Vibrio* sp.)
- ★ Improves feed conversion ratio for higher profitability
- ★ Reduce stress and mortality
- ★ Enhances nutrient absorption
- ★ Good for collagen formation and wound healing
- ★ Increases the length and weight of shrimp
- ★ Acts as a toxin binder, pathogen adherent and immunomodulator
- ★ Acts as an antioxidant, protect cells from oxidative damage

### Dosage:

300-500g/ton of feed

### Composition:

Prebiotics  
Probiotics  
Enzymes  
Vitamins  
Herbal extracts  
Algae &  
Natural minerals
